What is this product?

TYPE OF PRODUCT

The product is a Sub-Fund of ZEST ASSET MANAGEMENT SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Sub-Fund is established for an unlimited duration. However, the Fund may at any time be dissolved by a resolution of the general meeting of shareholders subject to the quorum and majority requirements applicable for amendments to the Articles. And, in the event that for any reason the value of the net assets in the Sub-Fund or Class has decreased to an amount below EUR 10 million or the equivalent in any other Reference Currency, respectively such amount determined by the board of directors to be the minimum level for such Class to be operated in an economically efficient manner, or if a change in the economic or political situation relating to the Sub-Fund or Class concerned would have material adverse consequences on the investments of the Sub-Fund or Class or in order to proceed to an economic rationalization, the board of directors may decide to compulsorily redeem all the Shares issued in the Sub-Fund or Class at the Net Asset Value per Share (taking into account actual realization prices of investments and realization expenses) calculated on the Valuation Day at which such decision shall take effect.

OBJECTIVES

The Sub-Fund has for objective to provide its investors with a medium-long term capital growth, by a diversified portfolio of equity securities issued by international companies listed on official stock markets and debt securities issued by international issuers. The Sub-Fund is actively managed without reference to any benchmark.

The investment approach follows an active management strategy without regard to geographical or sector allocation, security type or size. The same investment policy may be applied through investment in units of UCITS and other UCIs (within the below limit).

The Sub-Fund may also invest in unquoted securities in accordance with the limits set forth in Part A of the prospectus.

For the avoidance of doubt, the convertible bonds are to be considered as debt securities and shall therefore be aggregated to the ratios applicable to debt securities.

Subject to the provisions set forth in Part A of the prospectus:

the equity or equity-related securities will not exceed 90% of the net assets;

no more than 50% of the net assets in equities quoted on emerging countries' stock exchanges;

no more than 50% of the net assets in non-investment grade bonds, including bonds issued in emerging countries.

It is understood that these limits only apply to direct equities, bonds and related securities and UCITS and/or UCIs investing principally in equities and bonds; i.e. financial derivative instruments on equities or on bonds are not taken into account for the calculation of these restrictions.

The Sub-Fund will not invest:

directly in ABS/MBS. It shall however be mentioned that this ABS/MBS restriction that apply to direct investment in this asset class is waived for:

- investment in Exchange Traded Commodities (ETC) when seeking exposure to commodity markets (according to the Law of 2010, CSSF Circulars and without any possibility of deliverable commodities) when such ETC are structured as ABS or MBS. In any case, such investments in ETC (whatever their structuration being) will not exceed 20% of the net's assets of the Sub-Fund;
- more than 10% of its net assets in the units or shares of UCITS or other UCIs;
- in contingent convertible bonds;
- in total return swap.

It should be noted that the investment in units or shares of other UCITS and UCIs may entail a duplication of certain fees and expenses. If the Sub-Fund invests in units or shares of UCITS or UCIs managed by the investment managers' group, no subscription or redemption fee will be charged for investments by the Sub-Fund into other investment funds of the investment managers' group.

The Sub-Fund may also hold ancillary liquid assets (i.e. bank deposits at sight, such as cash held in current accounts with a bank accessible at any time) up to 20% of its net assets for treasury purposes. The aforementioned limit shall only be temporarily breached for a period of time strictly necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the Shareholders.

The Sub-Fund may also hold on ancillary basis money markets instruments dealt in on the money market.

The Sub-Fund issues only accumulation shares (shares in which any income earned is added to the share price).

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if your cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the prospectus for more information on the specific risks relevant to the PRIIP not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested

Investment of EUR 10,000	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 675	EUR 2,161
Annual cost impact (*)	6.8%	6.8%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.7% before costs and -0.1% after costs.
